-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 52-57 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claims further limit the data not the apparatus.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-28 and 52-57 rejected under 35 U.S.C. 102(e) as being anticipated by Hendricks et al.

Hendricks et al. shows, figure 1, an advanced set top terminal for cable television delivery systems. The system has an operations center 202 (first storage, host side device, first sending/receiving (S/R) unit). The Cable Headend acts as the retrieval unit, decision unit, reproduction unit and the second S/R. Note that the Cable Headend acts as a distribution center and a network controller. The ability to recognize and store data is inherent in these functions. Supplemental data can be provided when user requests more (intent of user). Communication links allow requests and replies to be sent and received. Different audio quality can be achieved upon request (Figure 21 for CD quality audio option). Hendricks et al. also teach subscriber payments.

Response to Arguments

4. Applicant's arguments filed 8/22/05 have been fully considered but they are not persuasive.

Applicant has actually made the claims more broad and a 102 rejection has been made.

The 101 rejection has been withdrawn.

Applicant asserts that the prior art does not show an automatic recording function. This is not relevant because applicant has claims drawn to an apparatus. The examiner pointed out in the last office action "Also note the intended use language of the claim elements, which affects the patentable weight of the elements." The prior art

structure has the ability to perform the intended uses recited in the claim language. The examiner suggests that applicant make use of means-plus-function language or pursue a method claim.

Applicant asserts that "an automatic storing control that automatically stores the data when it is verified as new content would not be inherent" in the prior art. This is not relevant because the examiner's last office action merely asserted that the Cable Headend inherently has the ability to recognize and store data. Applicant has not refuted this assertion.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
